SUMMARY

I have been a high school teacher since 2014 and I hold a master's degree in physics from the University of Copenhagen and a bachelor's degree in both physics and chemistry. As part of my master's degree in physics I completed the condensed journalism education at the Danish School of Media and Journalism and I have worked with communicating science since I started university. I love to teach.

EMPLOYMENTS

Aug. 2014 - now **Teacher at Roskilde Gymnasium**

I teach physics and chemistry (at all levels in the Danish three year high school-system) and hold the position of science coordinator and talent counselor.

Aug. 2014 – Jan.2015 **Writer for the Danish Science Illustrated**

I answered questions about science from the readers of Science Illustrated.

Sep. 2013 – Jan. 2013 **Science journalist at Experimentarium Media**

I wrote articles for the newspaper MetroXpress.

Sep. 2009 – Jan. 2013 **Explainer at Experimentarium (Science Center)**

I communicated science to the visitors at the science center by performing shows and making demonstrations for all age groups.

Jun. 2013 – Jul. 2013 **Editor in chief and journalist of the newspaper for The International Physics Olympiad**

I was the only journalist and editor in chief of the daily newspaper that was released every day during the week. The articles, which were written in English, were about physics, Danish physicists and the program for the following day.

The newspapers can be found here:
